Crim.

Samuel Martin Crim was born in Kentucky, Oct. 17, 1836. At 4 years of age he came with his parents to Missouri where he resided until his death, which occurred at his home after a few hours illness, from heart trouble, August 6, 1907. He was united in marriage to Mary D. Moss, April 13, 1869, who for one year has been awaiting his coming on the other shore.

He leaves one daughter, one brother and two sisters who will sadly miss his presence in their circle. The funeral services were conducted August 8, 1907, by Rev. Bailey of Monroe City, at Mt. Vernon church where he was laid to rest by the side of his departed wife.

Mr. Crim was one of the few men of whom it could be said that everyone who knew him was his friend. He was a devoted husband, a loving father and an upright loyal citizen.

The family has the sympathy of the entire community in their bereavement.

Moessner-Crabtree.

No one in the city is better known than Sophia Moessner, nor more popular. But she grew tired of going it alone and William Crabtree, of Clarence, was lonely, so: Sunday at 10 p. m. Mrs. Moessner's home was elaborately decorated with flowers for the connubial bower, and a few intimate friends were invited. So Rev. Read came and all was well. After the ceremony ices were served.

May the rose tree of love always bloom for them.

ITEMS FROM FARMERS

For Farmers, For Farmers And Pertaining To Farmers.

Money to loan at 5 per cent on farm security.—Meriwether & Meriwether.

We have at the head of our White Plymouths a fine cockerel bought from U. R. Fishel, whose motto is: "The Best in the World" and the premiums he captures prove him to raise that kind. Will sell eggs at \$1.00 for 15.—W. J. ROUSE.

Several registered Polled, Aberdeen Angus Bulls for sale to DAVENPORT & Co.

For Sale

Three hundred ewes and eleven bucks.—Walter H. Moss.

Joshua Jarman rented out his wheat ground and the 58 acre patch netted him \$9 per acre. We have a sneaking idea that the land didn't cost double that when he bought.

Henry Durst has sold 107 head of breeding ewes to Boone Bros and 75 to George Saffarous.

J B Gray and Son have sold 176 April lambs from Western ewes to Kendrick and Dawson for \$600.

Mike Madden's 55 acres of wheat yielded 2,100 bushels.

J R Wilson has 108 acres of corn that he thinks will make 15 barrels per acre.

Here is corn for your whiskers or your hogs. Buckman Bros have a two hundred acre field that they think will yield 15 barrels per acre. And Will tells us: Of course there are some fences through it, but there is seven hundred acres of corn there in one body that is just as good as ours. Mr. Buckman's 150 acres of oats made 50 bushels per acre and the 50 acres of wheat 30 bushels.

Ad Vaughn sold sixteen buck lambs to I P Stephens and has bought a thorough bred Shropshire Down buck.

Jim Cusack's corn is so big that he does not like to make an estimate on what the yield will be. He says: It is larger than the bumper crop of 1902.

M with Williams means Maurice not Mamie as last issue of this paper had it. So it was Maurice who sold the mare to Tim Kelley for \$150. And J B that sold the mule colt for \$60.

Dan K Yowell has sold his 1093 acre tract of land in Texas to Frank Clark of Quincy for \$12 per acre.

W B Arnold is another Monroe farmer that does things. He is now preparing for market 54 head of 3 year old steers, 20 head 2 year old steers, 84 head of 2 and 3 year old mules, 150 head of hogs. Will start on ten acres of sugar corn and has one hundred and twenty acres of field corn and a lot of old corn on hand.

Del Hagar has fifty acres of corn for which, he says, I would not take 75 bushels per acre.

Robert Rouse has sold a pair of suckling mules for \$160.

J M Proctor and Son are numbered among the big farmers of Monroe. They in a few days will begin to feed 240 head of cattle. They will start them with ten acres of sugar corn and behind that is two hundred acres of corn equal to the best ever raised in Illinois and Iowa.

Great Scott, what a country this would be for real estate men to come to to get solid production stories to base their wild dreams on for Texas or Alberta, Canada. Some one has said: "It's a poor blanket that won't stand stretching." In this vicinity the blanket is so good that it does not not have to be stretched.

J M Proctor and Son have 200 acres of corn that a conservative estimate places at 15 barrels per acre.

Lewis Lomborg places his thirty acres of corn at 12 barrels per acre.

J W White's twenty five acres of wheat yielded twenty eight bushels per acre.

Bloomington, Ill., Aug. 16.—William H Rowe, of Jacksonville, has just disposed of his year's crop of hogs to a local buyer at \$6.75 per hundred. They averaged 342 pounds and came to \$1,849.77. That information should have been embodied in the Monroe City Fair Association's Catalogue

ing a total cost for raising of \$220.

We look upon the above price \$2, as a pipe dream or typographical error. When it was shown to a successful hog producer and feeder, we learned: A hog can be clovered in Missouri for less money than in Illinois and corn fed as cheap or cheaper and that it would cost to raise and prepare 15 months old 342 pound hog at least \$7.50.
